

EDUCATIONAL PHILOSOPHY

The people of this community have joined cooperatively in this educational enterprise, the purpose of which is primarily to supply the educational needs of the children and youth of this community. In so doing, they have guaranteed to every educable child of school age the right to attend these schools; provided he abides by the policies, procedures and regulations adopted for their government. It is the school's responsibility to accept any child so qualified and do what it can to meet his educational needs.

We feel the educational needs of the children of this community to be:

1. To live and work democratically;
2. Health, both mental and physical;
3. Knowledge of self and environmental orientation;
4. Guidance in personal aims, purposes and goals
5. Basic communication techniques and logical thinking processes;
6. A desire to learn;
7. A sense of educational achievement;
8. Respect for honest labor and preparation for work;
9. Constructive use of leisure time;
10. Aesthetic appreciation and motivation.
